Re: Dunn Mine
ACT/037/017

Dear Mr. Tetting:

I am writing in response to your letter of June 7, 1982 concerning a review of the above referenced mine's file. I have reviewed the "Application History" as you wrote it and offer the following revisions:

October 24, 1980 - Atlas requested an amendment to increase acreage to 34.8 acres for evaporation pond - map included.

January 22, 1981 - Atlas sent DOGM a copy of the pond engineering report as sent to the Dept. of Health in response to their January 13, 1981 letter.

In addition, I was unable to locate a copy of the May 31, 1977 submittal for an alternative road site. Would you please forward a copy to me?

I will respond below to the requests contained in your June 7, 1982 letter by number:

1. I have been unable to locate a copy of the 1977 Annual Operations and Progress Report. You do have copies of the cover letter under which it was sent and the letter from the Division acknowledging receipt of it.
2. Enclosed are copies of current surface maps for the mine site and the pond. The map for the pond was originally submitted October 24, 1980 with the pond amendment.
3. Enclosed is a copy of Atlas' January 22, 1981 letter to the Division, which contained a copy of Atlas' response to the Department of Health's January 13, 1981 letter.
4. The evaporation pond design information is included in the January 22, 1981 letter to the Division. Enclosed is a copy of the February 20, 1981 letter from the Department of Health granting approval of the Dunn pond's engineering plans.
5. Enclosed is a copy of a topographic map showing the geographic relationship of the Dunn Mine's related surface facilities.
6. Enclosed is a copy of the 1980 Annual Operations and Progress Report and the cover letter under which it was sent on January 20, 1981.

7. The most current disturbed acreage change notation was included in the October 24, 1980 letter requesting an amendment to the Dunn Mine's Mining and Reclamation Plan for the evaporation pond. This amendment was for an additional 3.9 acres and brought the total disturbed area to 34.8 acres. I have enclosed a copy of said letter.

This should complete the review of the Dunn Mine's files. Please contact me with any questions you may have.

Respectfully,

A handwritten signature in black ink, appearing to read "Ricky J. Broschat", written over a horizontal line.
